

Tips On How To Get Started With

IFX ROBOT.COM

1

At this stage, you should have your Variance FX trading account set up and your algorithm sent to you.

2

You will be issued your VPS (virtual private server) log in details with Variance FX trading platform pre installed.

3

Open up your Variance FX trading platform.

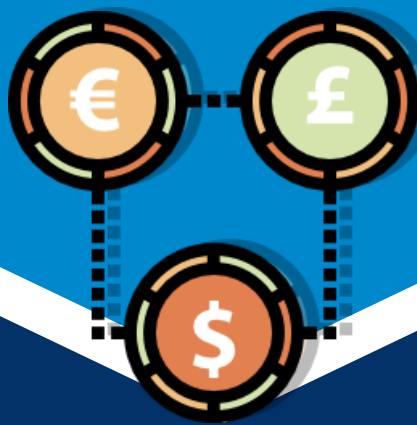

4

Select which currency pairs you want to trade and your risk settings.

5

Activate auto trading on your account and your account will begin to start trading automatically.

6

Should you require any assistance during this process, please contact your IFXrobot account manager.

7

Watch your account trade the financial markets.
